System Controller

Up to 6 "EE" units are controlled by the system controller allowing for high efficiencies and flow rates. Simple programming and exceptionally functional, the system controller is a powerful tool for your commercial water treatment needs. Compatible with theCK10, WS125, WS15 and WS2 valves.

- System Controller operates 2 - 6 units.
- Individual AC Adapters not required. Connected valves will be powered by the System Controller.
- System diagnostic and programming information for spreadsheet presentation may be uploaded to a standard USB drive.
- Two fused Single Pole Double Throw (SPDT) relay outputs are provided.
- Single demand-based meter output is provided.
- Solid state microprocessor with user-friendly front panel programming.
- Front panel displays for time of day, day of week, days until next regeneration, current system flow rate, and total system volume used (Totalizer).
- Front panel LED status indicators for Online, Standby, and Regeneration.
- Exceptionally versatile, ideal for applications with varying flow rates.

Item Number	≈Design Flow GPM	≈Design Peak Flow GPM	≈Potential Peak Flow GPM	Mineral Tanks	Total ft³	Brine Tanks	Valve
